

## IN THE CLAIMS

Please amend the claims as shown below. Claims 1-3, 5-6, 9-22, 24-25, 28-33, 35-40, 43, 45, and 47 are amended herein. This listing of claims will replace all prior versions and listings of claims in the Application.

---

1. (Currently Amended) In a server system communicatively coupled to a mobile device, a method for retrieving and communicating information, said method comprising ~~the steps of:~~

accessing receiving an instruction from said mobile device which identifies information by said server system, wherein said information corresponds to data displayed on said mobile device;

retrieving said information;

formatting said information into a form compatible with facsimile transmission, wherein said formatting is performed by said server system; and  
transmitting said information to a facsimile system.

2. (Currently Amended) The method as recited in Claim 1 further comprising ~~the steps of:~~

formatting said information into a form compatible with said mobile device;  
and  
sending said information to said mobile device.

3. (Currently Amended) The method as recited in Claim 1 wherein said information comprises said data ~~information~~ displayed on said mobile device.

4. (Original) The method as recited in Claim 1 wherein said information comprises a corpus of information corresponding to information displayed on said mobile device.

5. (Currently Amended) The method as recited in Claim 1 wherein said information comprises a webpage and wherein said ~~accessing method further~~ comprises receiving a Universal Resource Locator (URL) designating said webpage.

AI 6. (Currently Amended) The method as recited in Claim 1 wherein said information is a webpage, a file, a document, a graphic, a spreadsheet, a database ~~webpages, files, documents, graphics, spreadsheets, databases, e-mail, voice-to-text, voice-to-e-mail, or another any other~~ electronically formatted data.

7. (Original) The method as recited in Claim 1 wherein said server system is communicatively coupled to said mobile device via a wireless network.

8. (Original) The method as recited in Claim 7 wherein said wireless network includes the Internet.

9. (Currently Amended) The method as recited in Claim 1 further comprising:

receiving a facsimile transmission command; and

receiving a facsimile ~~(Fax)~~ number wherein a facsimile system is designated as a transmission destination.

10. (Currently Amended) The method as recited in Claim 1 wherein said  
~~further comprising~~ transmitting comprises sending said information to a designated  
facsimile ~~(Fax)~~ number.

11. (Currently Amended) A server system comprising:  
a bus;  
a communication interface coupled to said bus, said communication interface  
operable to communicatively couple with a mobile device and a facsimile system;  
a processor coupled to said bus;

—said processor for performing a method of retrieving and communicating  
information, said method comprising ~~the steps of~~:

accessing receiving an instruction from said mobile device which identifies  
information, wherein said information corresponds to data displayed on said mobile  
device;

retrieving said information;

formatting said information into a form compatible with facsimile transmission,  
wherein said formatting is performed by said server system; and

transmitting said information to said a facsimile system.

12. (Currently Amended) The server system as recited in of Claim 11  
wherein said method further comprises ~~the steps of~~:

formatting said information into a form compatible with said mobile device;

and

sending said information to said mobile device.

13. (Currently Amended) The server system as recited in of Claim 11 wherein said information ~~said data information~~ comprises information displayed on said mobile device.

14. (Currently Amended) The server system as recited in of Claim 11 wherein said information comprises a corpus of information corresponding to information displayed on said mobile device.

AI 15. (Currently Amended) The server system as recited in of Claim 11 wherein said information comprises a webpage and wherein said accessing method further comprises receiving a Universal Resource Locator (URL) designating said webpage.

16. (Currently Amended) The server system as recited in of Claim 11 wherein said information is a webpage, a file, a document, a graphic, a spreadsheet, a database ~~webpages, files, documents, graphics, spreadsheets, databases, e-mail, voice-to-text, voice-to-e-mail, or another any other~~ electronically formatted data.

17. (Currently Amended) The server system as recited in of Claim 11 wherein said server system is communicatively coupled to said mobile device via a wireless network.

18. (Currently Amended) The server system as recited in of Claim 17 wherein said wireless network includes the Internet.

19. (Currently Amended) The server system as recited in of Claim 11 wherein said method further comprises:

receiving a facsimile transmission command; and  
receiving a facsimile ~~(Fax)~~ number wherein a facsimile system is designated as a transmission destination.

20. (Currently Amended) The method as recited in Claim 1 wherein said further comprising transmitting comprises sending said information to a designated facsimile ~~(Fax)~~ number.

21. (Currently Amended) A method of using a mobile device communicatively coupled to a server system for retrieving and communicating information, said method comprising ~~the steps of:~~

AI  
sending a request for information to said server system;  
receiving at said mobile device information responsive to said request;  
displaying said information at said mobile device; and  
instructing said server system to transmit said information to a designated facsimile, wherein responsive to said instructing, said server system:  
formats said information into a form compatible with facsimile  
transmission, said formatting performed by said server system; and  
transmits said information to a facsimile system.

22. (Currently Amended) The method as recited in according to Claim 21 further comprising instructing said server system to transmit a corpus of information corresponding to information displayed on said mobile device.

23. (Original) The method as recited in Claim 21 further comprising instructing said server system to transmit a webpage.

24. (Currently Amended) The method as recited in according to step 23 wherein said webpage is designated by a corresponding Universal Resource Locator (URL).

25. (Currently Amended) The method as recited in Claim 21 wherein said information is a webpage, a file, a document, a graphic, a spreadsheet, a database ~~webpages, files, documents, graphics, spreadsheets, databases~~, e-mail, voice-to-text, voice-to-e-mail, or another ~~any other~~ electronically formatted data.

AI 26. (Original) The method as recited in Claim 21 wherein said mobile device is communicatively coupled to said server system via a wireless network.

27. (Original) The method according to Claim 26 wherein said wireless network includes the Internet.

28. (Currently Amended) The method as recited in Claim 21 further comprising ~~the steps of:~~

sending a facsimile transmission command; and

sending a facsimile ~~(Fax)~~ number wherein a facsimile system is designated as a transmission destination.

29. (Currently Amended) A computer-usable medium having a computer-readable program code embodied therein for causing a computer system to perform a process comprising: ~~the steps of:~~

accessing an receiving instruction from a mobile device which identifies information to be communicated;

retrieving said information;

formatting said information into a form compatible with facsimile transmission,  
wherein said formatting is performed by said server system; and  
transmitting said information to a facsimile system.

30. (Currently Amended) The computer-usable medium as recited in of  
Claim 29 wherein said computer-readable program code embodied therein further  
causes a computer system to perform a process comprising: ~~the steps of:~~  
formatting said information into a form compatible with said mobile device;  
and  
sending said information to said mobile device.

31. (Currently Amended) The computer-usable medium as recited in of  
Claim 29 wherein said information comprises data ~~information~~ displayed on said  
mobile device.

32. (Currently Amended) The computer-usable medium as recited in of  
Claim 29 wherein said information comprises a corpus of information corresponding  
to said data ~~information~~ displayed on said mobile device.

33. (Currently Amended) The computer-usable medium as recited in of  
Claim 29 wherein said information comprises a webpage and wherein said  
computer system further performs ~~the step of~~ receiving a Universal Resource  
Locator (URL) designating said webpage.

34. (Original) The computer-usable medium as recited in of Claim 29  
wherein said information is a webpage, a file, a document, a graphic, a spreadsheet,

a database ~~webpages, files, documents, graphics, spreadsheets, databases, e-mail, voice-to-text, voice-to-e-mail, or another any other~~ electronically formatted data.

35. (Currently Amended) The computer-usable medium as recited in ~~of~~ Claim 29 wherein said computer system is communicatively coupled to said mobile device via a wireless network.

36. (Currently Amended) The computer-usable medium as recited in ~~of~~ Claim 35 wherein said wireless network includes the Internet.

A1 37. (Currently Amended) The computer-usable medium as recited in ~~of~~ Claim 29 wherein said computer-readable program code embodied therein further causes said computer system to perform the steps of:

receiving a facsimile transmission command; and

receiving a facsimile ~~(Fax)~~ number wherein a facsimile system is designated as a transmission destination.

38. (Currently Amended) A system for retrieving and communicating information, said system comprising:

means for accessing ~~receiving~~ an instruction from a mobile device which identifies information to be communicated;

means for retrieving said information;

means for formatting said information into a form compatible with facsimile transmission, wherein said formatting means comprises a server; and

means for transmitting said information to a facsimile system according to said instruction.

39. (Currently Amended) The system as recited in Claim ~~38~~ 39 further comprising:  
means for formatting said information into a form compatible with said mobile device; and  
means for sending said information to said mobile device.

40. (Currently Amended) The system as recited in Claim 39 wherein said information comprises data ~~information~~ displayed on said mobile device.

41. (Original) The system as recited in Claim 39 wherein said information comprises a corpus of information corresponding to information displayed on said mobile device.

42. (Original) The system as recited in Claim 39 wherein said information comprises a webpage and wherein said means further comprises means of receiving a Universal Resource Locator (URL) designating said webpage.

43. (Currently Amended) The system as recited in Claim 39 wherein said information is a webpage, a file, a document, a graphic, a spreadsheet, a database ~~webpages, files, documents, graphics, spreadsheets, databases~~, e-mail, voice-to-text, voice-to-e-mail, or another ~~any other~~ electronically formatted data.

44. (Original) The system as recited in Claim 39 wherein said system is communicatively coupled to said mobile device via a wireless network.

45. (Currently Amended) The system as recited in Claim ~~44~~ 45 wherein said wireless network includes the Internet.

AI 46. (Original) The system as recited in Claim 39 further comprising:  
means for receiving a facsimile transmission command; and  
means for receiving a facsimile (Fax) number wherein a facsimile system is  
designated as a transmission destination.

47. (Currently Amended) The system as recited in Claim 46 ~~48~~ further  
comprising means of transmitting by facsimile to said a designated facsimile (Fax)  
number.
